

HVAC SYSTEM FOR A VEHICLE WITH CONCEALED VENTS

Abstract

An air delivery system (10) for a vehicle (12) includes an air plenum (42) and a coupling joint (14) that is coupled to the air plenum (42). The coupling joint (14) is configured to reside between and is hidden by overlapping sections (34,36) of a vehicle housing (16). An air transfer device (50) passes air through the air plenum (42) and the coupling joint (14).
